

1 Create Account

Step 1:
Search "Renon Smart" on Google Play or the App Store to download and install.

Step 2:
Open the app and ensure you select the correct country. Click "Register" to create an account. Once registered, your account will default to "General User" level.

2 Bind Device

Step 1:
Log in to the app, navigate to the "Mine" tab, and select "MyDevice".

Step 2:
Click the "+" icon to add a new device.

Step 3:
Manually enter the device ID or scan the QR code on the battery. If your account is a newly registered account and has never been bound to a device before, scanning QR code or entering the device ID can be used as a tourist to directly bind the device under the installer or installer worker. After binding devices, you also need to select the installer worker as the upper level for binding.

Step 4:
Click "Submit" to confirm, and the device will appear in your "My Device" list.

Step 6:
After click submit successfully binding, the page automatically turn to the binding of the superior user, select your superior to bind, and you can view the full function of the device.

3 Battery Network Configuration

Step 1:
Securely screw the antenna into the connection port before starting Wi-Fi configuration.

Step 3:
Open the Renon Smart APP, go to "Mine", tap "Network Config", and select "Bluetooth Configuration Network".

Step 4:
Search for the battery's Bluetooth signal using the serial number on the nameplate.

*If the signal doesn't appear, set the dial code to all down "000000" first, then back to all up "111111", and try searching again.

Step 5:
Enter your Wi-Fi name and password, and click "Confirm" to complete the configuration.

03

04

05

Step 6:
After completing the steps, the WiFi icon on the battery screen will blink, indicating it's connected to the router. Then, set the inverter code to "000000".

And wait about two minutes. Once the Wi-Fi icon stops blinking, the battery is connected to the cloud platform, and you can view its information in the APP.

Note:
Indicator lights may vary by model; refer to the user manual for details.

4 Upgrading Battery Firmware

After the battery is connected to the cloud platform, go to "Mine", select "My Device", choose the device, and click "Firmware Upgrade" on the details page to update the firmware.

*If the battery firmware is up to date, a prompt will indicate that no upgrade is required, as shown above.

06

The account password for the web page is the same as for the APP. If you have any questions, please contact support@renonpower.com.

Note:
Web version of the cloud platform:
